RE: Green Energy Panel Instalation

To whom it may concern.

Danny Weaver installed his Green Energy Panels at my Bone Daddy's location in September of 2018. We saw an 11.7% reduction in our bill the first month and a 21% reduction in month number 2. If these results continue, we will recover our initial investment in about 8 months.

We have installed the panels in two of our other locations and will install them in the remaining four locations if the results for the second group of installs matches the results we've achieved with the first installation.

We are pleased with the work done by Danny and his team and look forward to additional savings throughout the coming years.
